

GrowingWorld Vietnam

the exclusive Vietnam distributor of A9 TECHNOLOGY®

A9 TECHNOLOGY®, invented in 1988, is a major innovation in the field of mechanical lubrication, as it allows all the mechanical kinematic chain (engine, transmission, injection circuit, cooling) to operate "film against film" instead of "metal against metal" unlike conventional oils. Enjoy 39 exclusive benefits associated with its use.

A9 TECHNOLOGY® products are NOT additives but treatments and the technology is based specifically on Nano coating, protected by patents worldwide.

A9 TECHNOLOGY® products are MISCIBLE and NON-SOLUBLE, they do NOT modify the characteristics of the lubricants or the fuel but create a protective film.

### THE BIODEGRADABLE SHAMPOO, FOR MANUAL USE OR WITH A FOAM GUN

COCORECO® CLINCAR is a biodegradable shampoo, economical and ecological for professional use. Ideal for cleaning, protecting and shining body, windscreen, wheels, glass and chromium either manually, in a car wash, or pressure washer.

Ready to use with the unique 300 ml BRUMECO reusable hand atomiser, CLINCAR is also available in 20L jerricans, with 2 levels of concentration:  
- 30%, the most common, COCORECO® CLINCAR C30  
- 100% for severe conditions, COCORECO® CLINCAR SC100

USAGE INSTRUCTIONS: For hand washing, spray evenly on the surface to be cleaned, use a wet scrubbing glove or an appropriate microfiber cloth such as MICROFIBRECO 320 or 560, making circular movements. Rinse with clean water. Renew as necessary to maintain the gloss finish. To dry, use a clean microfiber cloth such as MICROFIBRECO 320, regularly squeezing out excess liquid until the surface is dry.

For pressure washer or car wash installation, incorporate COCORECO® CLINCAR, setting the desired dosage to optimize the required cleanliness and the brightness level.

Only COCORECO® CLINCAR need to be use with water.

COCORECO®  
CLINCAR

MICROFIBRECO®

### A RANGE OF MICROFIBERS SPECIALLY CONCEIVED TO OPTIMIZE PERFORMANCES OF OUR VALETING PRODUCTS

MICROFIBRECO® consists of 4 microfiber cloths to ensure the performance of A9 TECHNOLOGY® valeting products such as COCORECO® and LUSTRECO®.

MICROFIBRECO® 290 is designed for wiping hard and dirty areas, particularly in a garage or workshop. Its special curls (with a weight of 290gr/m2), offer both excellent dry and moist absorption, against dirt and grease, without risk of scratching paint finishes.

MICROFIBRECO® 300 is the only laser cut cloth (with a weight of 300gr/m2), avoids risk of scratching, has both high absorption and polishing qualities. Intended for use after washing.

MICROFIBRECO® 320 is mainly used for glass surfaces (table tops, mirrors, windows etc.), because it doesn't leave streaks or residue after use. This cloth is essential for cleaning professionals in the car wash or glazing industries and has a double-face, due to the way it is knitted during manufacture. Cloth weight is 320gr/m2. The matt side is used to apply the cleaning product and the bright side polishes and shines the surface.

MICROFIBRECO® 560 with its long and soft fibres is made for automotive and boating applications. It polishes and shines as it rubs. Its versatility is unmatched and produces excellent result. Cloth weight 560gr/m2.

#### MAIN CHARACTERISTICS:

Size = 40cm x 40cm  
Packing = In plastic bag per 5, or in PAQUECO\* with BRUMECO\*®  
Composition = 70% polyester and 30% polyamide  
Washing = By machine or by hand from 30°C to 90°C as needed.  
Withstands 200 to 300 washes. Do not tumble dry.

- CLINCAR®  
The biodegradable shampoo, for manual use or with a foam gun.
- MICROFIBRECO®  
A range of microfibers specially conceived to optimize performances of our valeting products.

## COCORECO® DEMOUSCAR

**THE BIODEGRADABLE, WATERLESS  
DETERGENT THAT DEGREASES, CLEARS BUG DEBRIS AND  
REMOVES PROTECTIVE PARAFFIN WAX ON NEW VEHICLES**

**COCORECO® DEMOUSCAR** is a biodegradable, multi-purpose and multi-performance detergent, used without the addition of water. It is ideal for a quick clean. Conceived to degrease, descale, remove protective paraffin wax and clear bug debris on any surface such as vehicle bodywork or any type of floor, to clean interior fabrics (lining, trim, carpets, seating and boot) and the exterior of any vehicle, including engine compartment and wheels.

Ready to spray with the unique 300 ml BRUMECO reusable hand atomiser, BRUMECO is also available in 20L jerricans and a choice of 3 levels of concentration :

- 20% the most common, **COCORECO® DEMOUSCAR**
- 70% for industry, **COCORECO® DEMOUSCAR C70**
- 100% for severe use, **COCORECO® DEMOUSCAR SC100**

**USAGE INSTRUCTIONS:** Spray in an even pattern on the surface to be cleaned and let BRUMECO act for a few moments. Then wipe with a microfiber cloth such as **MICROFIBRECO 290 or 560** using circular movements. Change the microfiber cloth when dirty or too wet. To obtain a full gloss finish, use our complementary **COCORECO® NETCAR or NETCAR TROPICAL**.

**THE CLEANER THAT PROTECTS  
AND SHINES BODYWORK,  
GLASS, WINDSCREEN AND CHROME**

**COCORECO® NETCAR TROPICAL** is a biodegradable, multi-purpose and multipurpose cleaning agent. Used undiluted (without water), it is ideal for a quick clean.

Specially conceived to clean, protect and shine body, windscreen, window and chromium, in any climate, even in tropical areas.

Ready to spray with the unique 300 ml BRUMECO reusable hand atomiser, **NETCAR TROPICAL** is also available in 20L jerricans.

**USAGE INSTRUCTIONS:** Spray in an even pattern on the surface to treat, (clear insects, if necessary, beforehand with **COCORECO® DEMOUSCAR**), then wipe with an appropriate microfiber cloth such as **MICROFIBRECO 320 or 560** using circular movements. Change the microfiber cloth when dirty or too wet. Renew as often as necessary to maintain the full gloss finish.

## COCORECO® NETCAR TROPICAL

## COCORECO® BRICAR

**THE MULTI-USE PLASTIC  
AND RUBBER RENOVATOR**

**COCORECO® BRICAR** is a plastic and rubber renovator, economical and ecological, for professional use. Ideal for the engine compartment, tyre sidewalls, dashboard and plastic trim.

Ready to spray with the unique 300 ml BRUMECO reusable hand atomiser, **COCORECO® BRICAR** is also available in 20L jerricans. Prior to use, shake the container thoroughly (upside down) to make the active substances homogeneous.

**USAGE INSTRUCTIONS:** Spray evenly over the surface and use a hair brush to spread **COCORECO® BRICAR**. Dry with a microfiber cloth such as **MICROFIBRECO 290 or 560** using circular movements. Renew as often as necessary to maintain the gloss finish. **COCORECO® BRICAR** is easy to use and non toxic, so is safer for the user and the environment.

**THE POLISH WHICH REMOVES SURFACE  
SCRATCHES AND REVIVES COLORS**

**LUSTRECO®** is a finishing polish to remove surface scratches and other deposits such as road residues. **LUSTRECO®** revives colours and places a protective film on paintwork. **LUSTRECO®** can also be used on surfaces such as windows, wheels or bright trim (chrome or stainless).

Ready to use, **LUSTRECO®** is available in a 500 ml flask, supplied with a special sponge and also in 5kg plastic buckets. Before use, shake thoroughly, with the container upside down, to make the active components homogeneous.

**USAGE INSTRUCTIONS:** Apply **LUSTRECO®** evenly with the special sponge supplied, over the surface to be polished and leave for a few moments. Then wipe with a clean microfiber cloth such as **MICROFIBRECO 560**, making circular movements. Renew as much as is needed to maintain a full gloss finish.

## LUSTRECO®

**A9 TECHNOLOGY® ALSO OFFERS A  
COMPREHENSIVE FILM FORMING RANGE OF:  
STANDARD LUBRICANTS  
MECHANICAL TREATMENTS  
(ENGINE, TRANSMISSION & FUEL SYSTEM)  
COOLANTS, ALL SEASON SCREEN WASH  
& LITHIUM GREASE**
